RUPESH VARMA

Software Developer | Web Development & Cybersceurity

varmarupesh101@gmail.com | linkedin.com/in/rupeshvarmab5264 | github.com/Rupesh-001

CAREER OBJECTIVE

Motivated M.Sc. Information Technology student with a strong interest in Cyber Security, Digital Forensics, and Full-Stack Web Development. Hands-on experience building web applications using Python, Flask, React, and MongoDB through academic and independent projects. Eager to apply analytical and technical skills to contribute to real-world software development and cyber security initiatives.

SKILLS

Programming Languages: Python, Java, JavaScript, HTML5, CSS3

Web Development: React.js, Vite, Responsive Web Design

Database: MongoDB, Firebase

Tools & Platforms: Git, GitHub, VS Code, Android Studio, Postman, VirtualBox, Vercel, Render

Cyber Security & Forensics: Digital Forensics, SHA-256 Hash Verification, Chain of Custody, Evidence Integrity

Currently Learning: Android Development, Cyber Security, Digital Forensics, Wireshark, Metasploit, Kali Linux, Autopsy

EDUCATION

Master of Science in Information Technology (M.Sc. IT), Parul University *2025 - 2027 (Pursuing, 3rd Semester)*
SPI: 7.84 (Semester 1) | 8.03 (Semester 2)

Bachelor of Science in Computer Science (B.Sc. CS) *Mumbai | 2025*
CGPA: 7.68

Higher Secondary Certificate (12th) *2022*
Percentage: 49.00%

Secondary School Certificate (10th) *2020*
Percentage: 75.20%

PROJECTS

Digital Evidence Management System Engineered a secure digital evidence management system using Flask and MongoDB to support forensic investigation workflows.

- Enforced SHA-256 hash verification to preserve the integrity of digital evidence.
- Designed role-based authentication for 3 distinct user roles (Admin, Investigator, Analyst).
- Maintained a complete chain of custody with detailed audit logs for evidence tracking.

InterviewBotX

- Built an AI-powered mock interview platform to help users practice technical and behavioral interviews.
- Configured secure user authentication using Firebase.
- Integrated Gemini AI to generate real-time interview questions and feedback.
- Added secure file upload and tracking functionality within the platform.

Password Strength Analyzer

- Created a tool to evaluate password complexity and overall security strength.
- Implemented detection logic to flag weak or commonly used passwords.
- Generated suggestions for stronger password combinations based on analysis results.

LANGUAGES

English, Hindi
